

## Wet Chemical Extinguishers

Portable Stored Pressure Type

## Features :

- Simple operation and maintenance.
- Exceptionally effective on class A and F.
- Manufactured to European Standard BS EN3-7
- Portable and compact design.
- 15 bar working pressure.
- Cylinder made of special steel to withstand high pressures, tested at 30 bars.
- High-grade brass head assembly ensures reliability and optimizes efficiency.
- High gloss polyester powder painted stabilized after shot-blasting ensures corrosion resistance under extreme condition.
- Safety valve is fitted in each extinguisher for maximum safety.
- Discharge nozzle designed to produce a jet of extinguishing gas for fast fire suppression.
- Special hangers for wall mounting.
- Label in Arabic and English language.

## Specifications:

Model	ASPK-6
Diameter(mm)	160
Cylinder height(mm)	433
Cylinder weight(kg)	2.8
Extinguisher weight(kg)	9.5
Filling charge	6L FUREX FF
Temperature	+5°C + 60°C
Working pressure(bar)	15
Test pressure(bar)	<b>30</b>
Fire rating	13A 75F
